

## Codero Cloud Backup

Protect all of your data. Never pay a ransom.  
Sleep easier at night.

Codero Cloud Backup is an enterprise-grade direct-to-cloud backup solution that protects servers, desktops, laptops, tablets, and smartphones, all in one solution.

### Key Features & Benefits

#### Protect All of Your Data

With so many untethered laptops and mobile devices, IT is challenged with protecting distributed data. Codero Cloud Backup supports the most popular operating systems and protects servers, workstations, laptop fleets, and mobile devices.

#### Unlimited Version History

While some providers won't let you access every previously saved iteration of your files (e.g., only versions from the past 15 days), Codero Cloud Backup provides an unlimited version history without such restrictions.

#### Anomaly (Ransomware) Detection

Codero Cloud Backup includes Anomaly Detection that proactively notifies you when the changed file count surpasses a specified threshold. These early warnings can limit the amount the damage inflicted by ransomware while also pinpointing the time of infection.

#### Snowden-Proof Encryption

We encrypt files with AES 256 bit encryption before being transferred over a secure SSL (AES 256 bit) to one of our top-tier data centers. We also encrypt your data at rest within our data centers. For added security and privacy, we offer UltrasafeMAX, an exclusive, double blind encryption method that gives you, and only you, access to decrypt data.

#### Trust in the Cloud

By backing up your information to the cloud you can easily access, manage, and recover your data from any device via our online web portal — log in from any browser, even your tablet or smartphone.

#### Road Warriors & Branch Offices

For many IT organizations, protecting mobile devices and laptops for remote users and branch offices is a major headache. With Codero Cloud Backup, you can protect all of your data — no matter where it resides.

Judged to be the fastest solution in terms of upload speeds: “Unrivaled initial backup speed and a full set of features and tools make it a top choice for off-site data protection.”

(Source: PC Magazine, February 2016)

## How it works:

### Mass Deployment

You can mass deploy backup agents to branch office laptops, desktops, and mobile devices. You can even integrate your deployment with Active Directory to automatically create accounts.

### Setup Monitoring Alerts

Create alerts to show errors, warnings, successes, missed backups, anomalies, or any combination of these. Proactive alerts will save you time and ensure all of your organization's data and devices are protected.

### Test a Recovery

With Codero Cloud Backup, you can recover files and folders, even entire images, in seconds. With unlimited testing, you can even run as many test recoveries as you'd like.

## Regulatory Compliance

Codero Cloud Backup has been built to meet the needs of businesses and organizations that handle sensitive information. Proactive regulatory compliance capabilities ensure that you stay ahead of potential data risks.

#### ENDPOINTS

Smartphones  
& Tablets

#### WORKSTATIONS

Desktops &  
Laptops

#### SERVERS

Physical & Virtual

#### REPLICATION CHOICE

Infrascale, Private or  
Public (optional)

Centralized dashboard simplifies data protection across offices and devices.

Protect mixed environments, including physical and virtualized data and 100+ operating systems (Windows & Mac).

Military-grade encryption: encryption in transit, encryption at rest.

## Cloud Flexibility

With Codero Cloud Backup, you choose where to store your data: our cloud, your cloud, or any cloud. If you choose to host your data with Infrastcale, you can select from one of our 15 global, Tier III and Tier IV, data centers.

## Optional Services

### EXCHANGE GRANULAR RECOVERY

For many organizations, email is the number one mission-critical application. That's why we offer Granular Exchange Recovery that lets you restore an entire mailstore, an individual mailbox, or individual emails, attachments or calendar objects directly back to your live Exchange store.

### BARE METAL BACKUP & RECOVERY

Beyond files and folders, Codero offers a volume-based Bare Metal Backup & Recovery option which lets you recover a full working machine or VM from scratch after a catastrophic failure. Typically, the process involves reinstalling the operating system and software applications and then, if possible, restoring data and settings.

## Supported Systems

Windows XP\*, Vista (SP2) and up  
Windows Server 2003\*, 2008 (SP2) and up

Microsoft SQL Server 2008 and up  
Microsoft Exchange Server 2010, 2013

Mac OS X 10.8 and up

Linux Volumes supported by network-mapping to a PC or Mac

Android 2.2 and up  
iOS 7.0 and up

\* Some current features are not supported with this OS.

## About Codero

Codero is an infrastructure and technology enabler that facilitates the adoption and use of advanced and custom cloud and technology solutions. A provider of dedicated, managed, and hybrid cloud services, backed by exceptional customer service, Codero serves over 3,500 customers worldwide. Services include a portfolio of custom hosting and technology solutions focused on the specific needs of small and medium businesses and community anchor institutions. Codero helps customers and partners live and thrive in the cloud. Learn more about Codero at [codero.com](http://codero.com).
