Hybrid Multi-Cloud Hosting
Run every task, in the right environment, at the right time.

Hybrid multi-cloud architecture can combine any type of hosting resources from multiple vendors to create the ideal environments for all of your processes and applications.

If your organization wants the ability to shift workloads, data, and processes across multiple hosted, on-premises, private, and public cloud services, a hybrid multi-cloud management approach works best.

- PUBLIC TO PRIVATE CLOUD
- BARE METAL TO MULTIPLE CLOUDS
- CLOUDS FROM MULTIPLE HOSTING PROVIDERS
- OR ANY COMBINATION THEREOF

Microsoft Azure

aws

Performance
Put resource-intensive processes on high-performance bare metal or legacy hardware, without missing out on the cloud.

Cost Savings
Select the most cost-effective infrastructure for each application and task, and the most affordable services from each vendor.

Avoid Vendor Lock-In
Ensure you always have access to the best rates and latest technology, no matter who is offering it.

Modernize w/o Losing Legacy Investments
Keep your legacy systems while adding modern cloud resources to run alongside them.

Business Continuity
Set up redundancy from one cloud provider to another to mitigate your risks and reduce the effects of an outage on your business.

codero

Codero is the hybrid multi-cloud expert

Every department within your company has its own, constantly changing IT needs and no single hosting platform or vendor can satisfy them all.

Our team gets to know your company and takes a platform-agnostic approach to give you the ideal infrastructure for your entire organization:

- Complete, platform-agnostic hybrid multi-cloud architecture

- White-glove migration or implementation

- Communicative, proactive IT management, including security updates

- Azure and AWS Certified Partners

- Microsoft Office 365 licensing

- 24/7/365 support from familiar voices (you'll get to know our team of world-class IT pros)

Let's have a conversation.

Hybrid multi-cloud architectures provide a secure and powerful environment where businesses can flourish. But this approach requires uniform solutions in terms of cost control, performance analysis, and capacity management.

We make hybrid multi-cloud architecture, implementation, and management easy and affordable.

Let's connect.
