

KVM Over IP remote access... control over dedicated servers

Keyboard, Video, Mouse (KVM) Over Internet Protocol (IP) provides flexible management for up to eight people simultaneously to access and control any single server. Using out-of-band management to your servers allows you to troubleshoot remotely on a server that has lost connectivity and also perform remote installation of your operating systems.

KVM technology offers complete BIOS-level management of servers from a single, unified interface. You gain real-time administrative access at the root level with secure SSH v2 encryption.

KVM over IP:

- Securely reboot your sever from any location at any time
- Gain BIOS-level or RAID control from a single, unified interface
- Browser-based GUI to install and run applications
- Dual Power and dual Gigabite Ethernet with automatic failover
- Setup - \$50 (for all monthly, annual, semi-annual)
- Monthly - \$25

Standard with KVM over IP:

- 100% uptime guarantee
- 24/7/365 live U.S.-based support
- Customized configurations
- 100% powered green hosting
- Rewards Points program
- SAS 70 Type II certified
- Knowledge Base detailed answers
- Live chat real-time support
- Customer portal for troubleshooting
